

Certificate II Automotive

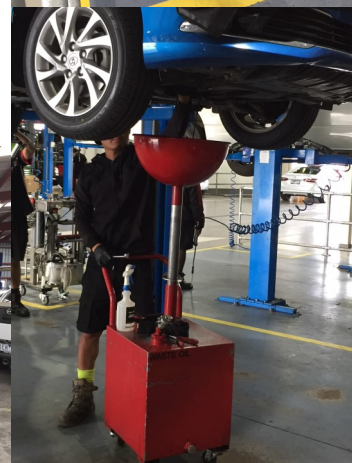

Becoming a motor mechanic is a dream career for two of our P-TECH students.

Recently Brock and Tyler commenced a Certificate II in Automotive (Motor Mechanics) at the Gordon and this week they had the opportunity to tour the state of the art facilities at Blood Toyota where they will be doing their regular "hands on" work placements.

They had the opportunity to see the service division in full swing including the express bays where full services are carried out by two mechanics in a one hour turn around. They also visited the new and used car service division to see the mechanics in action there.

Thanks to the support of mentors Barrie and Shane our students will be able to experience an amazing opportunity to gain workplace skills.

Thanks again Blood Toyota for joining our group of P-TECH industry supporters.
