

Certificate II in Automotive (MOTOR MECHANICS)

Budding motor mechanic Brock who is studying a CERTIFICATE II in Automotive (motor mechanics) at the Gordon, recently completed his safety induction tour at Blood Toyota and within minutes was in the workshop, head under the bonnet and learning from one of the qualified mechanics.

Brock will have the opportunity to work alongside several different mechanics in various locations within the Toyota dealership.

Thanks to mentor Shane for running the safety induction which is compulsory for all Toyota employees and also part of the Certificate II course at the Gordon.
